THIS IS UNEVALUATED INFORMATION

25X1

1. The T-2 Program at the Hochfrequenzwerk fuer Fernmeldewesen, Ostendstrasse 1-5, Berlin-Oberschoeneweide, has been completed. The T-2 Program, which covered the period from 1 August to 15 December 1951, concerned the delivery of 400 television receiving sets and transmission tubes to the USSR as priority reparations. From 15 September on, employees of the plant worked two shifts a day and on Sundays in order to meet the deadline set by the program. It was planned to produce 200 spare tubes during the period from 15 December to 18 December 1951. All deliveries of tubes to the Reparations Account go through Dresden.
2. In October and November 1951, Hauptgebäude III, the section where television picture tubes were manufactured, was placed off limits to all plant personnel not working in the television section. This section occupies one whole floor about 76 x 30 m. square. Three hundred employees work in the section; the factory employs about 6000 workers in all.
3. At present, there is a shortage of anode sheet metal. Carbon tetrachloride, which is dangerous to the worker's health, is now being used instead of trichloroethyl, which was formerly used and has been found to be serviceable and not dangerous. Trichloroethyl was a substitute product itself, since the equipment was originally designed to use perchloroethyl.
4. The Oberspree Werke are now manufacturing all the RFT equipment which is to be installed in the Adlershof television station.
